CHARLES A. MARMOR	

CHARLES A. MARMOR SUPERVISORY PATENT EXT TECHNOLOGY CENTER: Continuation of 3. NOTE: regarding claim 1, Applicant's amendment to claim 1 at line 6 from "in a manner to ensure the control of the stoma restriction" to the currently amended "in a manner to control the stoma restriction" imparts uncertainty to the claim because it is unknown, based on the amendment, whether or not the second chamber physically controls the stoma restriction or simply ensures the control of such. Thus, it is uncertain whether or not the scope of the invention has changed.

Continuation of 11. does NOT place the application in condition for allowance because: regarding the Baro reference ('809), Applicant contends that the chambers of the artifical sphincter of Baro always have the same pressure which clearly differentiates this embodiment from the embodiment according to the present invention. However, this argument is not persuasive because: such a limitation is not recited in the claim language. It is noted that this feature upon which applicant relies is not recited in the rejected claim. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Baro, furthermore, is still consistent with the claim language of "ensur[ing] the control of the stoma restriction" as recited at line 6 of claim 1. Therefore, the claims are not placed in condition for allowance.
